Restrictions

Invalid characters

Applies to:  

Certain characters have special meanings when used in file names in OneDrive, SharePoint, Windows and macOS, such as "*" for wildcards, and "\" in file name paths. If a file or folder you're trying to upload to OneDrive contains any of the characters listed below, it may prevent files and folders from syncing. Rename the file or folder to remove these characters before you upload it.

Characters that aren't allowed in file and folder names in OneDrive, OneDrive for Business on Office 365, and SharePoint Online

Characters that aren't allowed in file and folder names in OneDrive for Business on SharePoint Server 2013

" * : < > ? / \ |

~ " # % & * : < > ? / \ { | } .

Notes:

- To rename a file or folder in Windows, select it and press F2. To rename a file or folder on a Mac, select it and press the 'return' key.
- Some organizations don't yet support # and % in names. If you're a global admin or SharePoint admin in Office 365, see [Enabling # and % Support](#) on the SharePoint blog to learn how to allow these characters.
- If you're using Office 2010, you can't use "&" in file and folder names.
- For more information, see [When OneDrive renames items with invalid characters](#) and [Why has my filename changed from comma to ^J](#).

Invalid file or folder names

Applies to:  

These names aren't allowed for files or folders: .lock, CON, PRN, AUX, NUL, COM1, COM2, COM3, COM4, COM5, COM6, COM7, COM8, COM9, LPT1, LPT2, LPT3, LPT4, LPT5, LPT6, LPT7, LPT8, LPT9, _vti_, desktop.ini, any filename starting with ~\$.

Notes:

- "_vti_" cannot appear anywhere in a file name

Synchronization with NGSC

- Next Generation Sync Client:
- 30 Million documents each library
Performance decreases > 100.000 files !!
- NGSC Limit: **300.000** files per instance
- File-Length: **100 GB**
- File-Name ~~256~~ **400** characters
- ~~Not valid characters: # and %~~
- No Network/Mapped Drives
- No Authenticated Proxies
- No libraries with settings: CheckOut
- ~~No IRM (RMS) libraries~~

Summary

Automatic Updates

To apply sync client updates, computers in your organization must be able to reach the following:

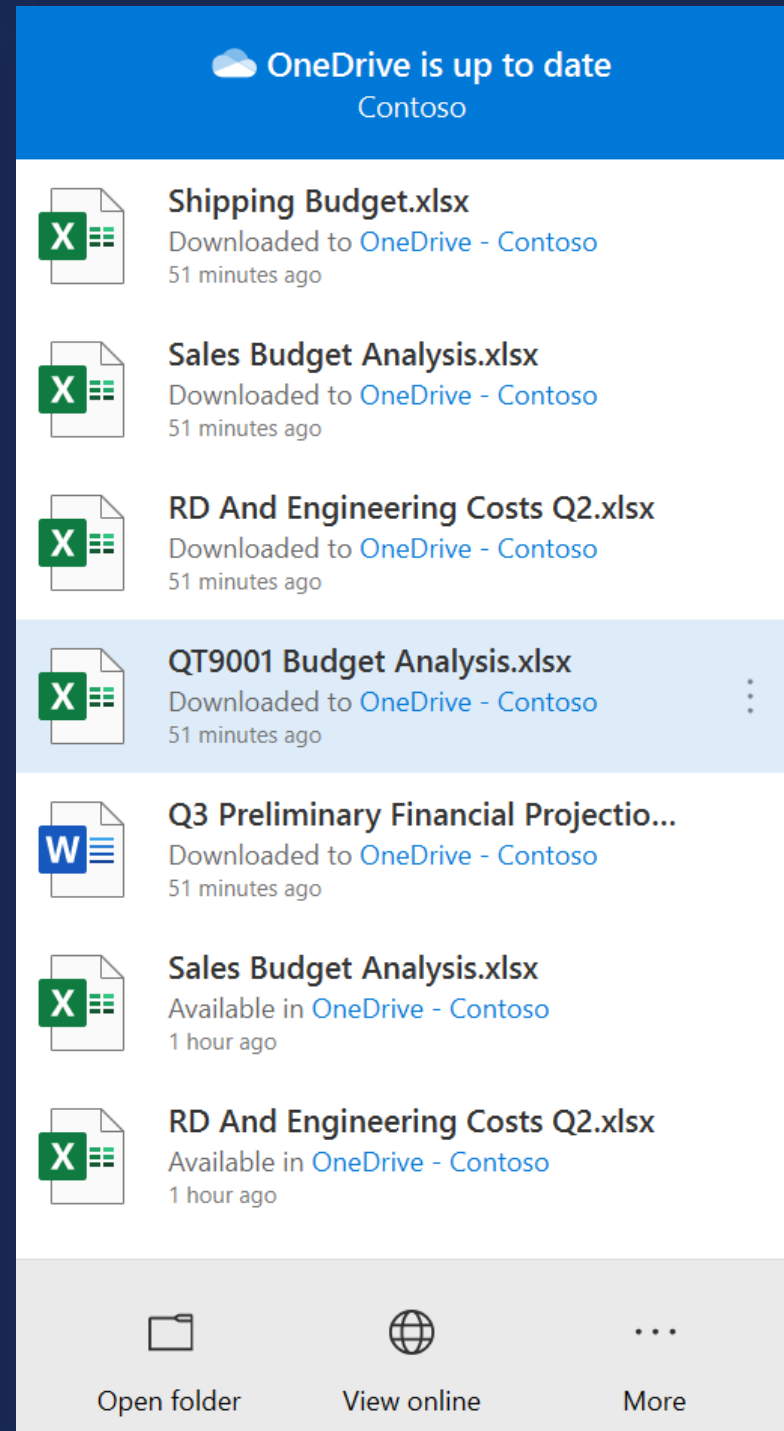

"oneclient.sfx.ms" and "g.live.com"

Make sure you don't block these URLs. They are also used to enable and disable features and apply bug fixes.

TCP: 443, 80

[Office 365 URLs and IP address ranges](#)

Windows Notification Service (WNS)

- **What?**
- Get changes to files in the cloud as fast as possible
- **Why?**
- Faster changes across devices (push vs. pull)
- Less wasted battery life
- Less network utilization
- Better performance across service
- **Actions**
- ❑ Allow traffic to ***.wns.windows.com**

Office 365 URLs and IP address ranges

Summary

10 Group Policies to control Windows 10 devices and OneDrive

Storage Sense Global

Storage Sense can automatically clean some of the user's files to free up space.

Storage Sense is automatically turned on when the system is at **low disk space** and is set to run whenever the system is at storage pressure.

Storage Sense can be changed in Storage settings or set with the "Storage Sense cadence" group policy.

10 Group Policies to control Windows 10 devices and OneDrive

Cadence

Configure Storage Sense or run it now

Storage Sense

☒ On

Storage Sense runs automatically when you're low on disk space. We cleaned up 0 bytes of space in the past month.

Run Storage Sense

During low free disk space

Temporary Files

☒ Delete temporary files that my apps aren't using

Delete files in my recycle bin if they have been there for over

30 days

Delete files in my Downloads folder if they have been there for over

Never

Locally available cloud content

Storage Sense can free up space by removing unused cloud-backed content from your device.

Content flagged as "Always keep on this device" will not be affected.

10 Group Policies to control Windows 10 devices and OneDrive

Storage Sense Recycle Bin cleanup threshold

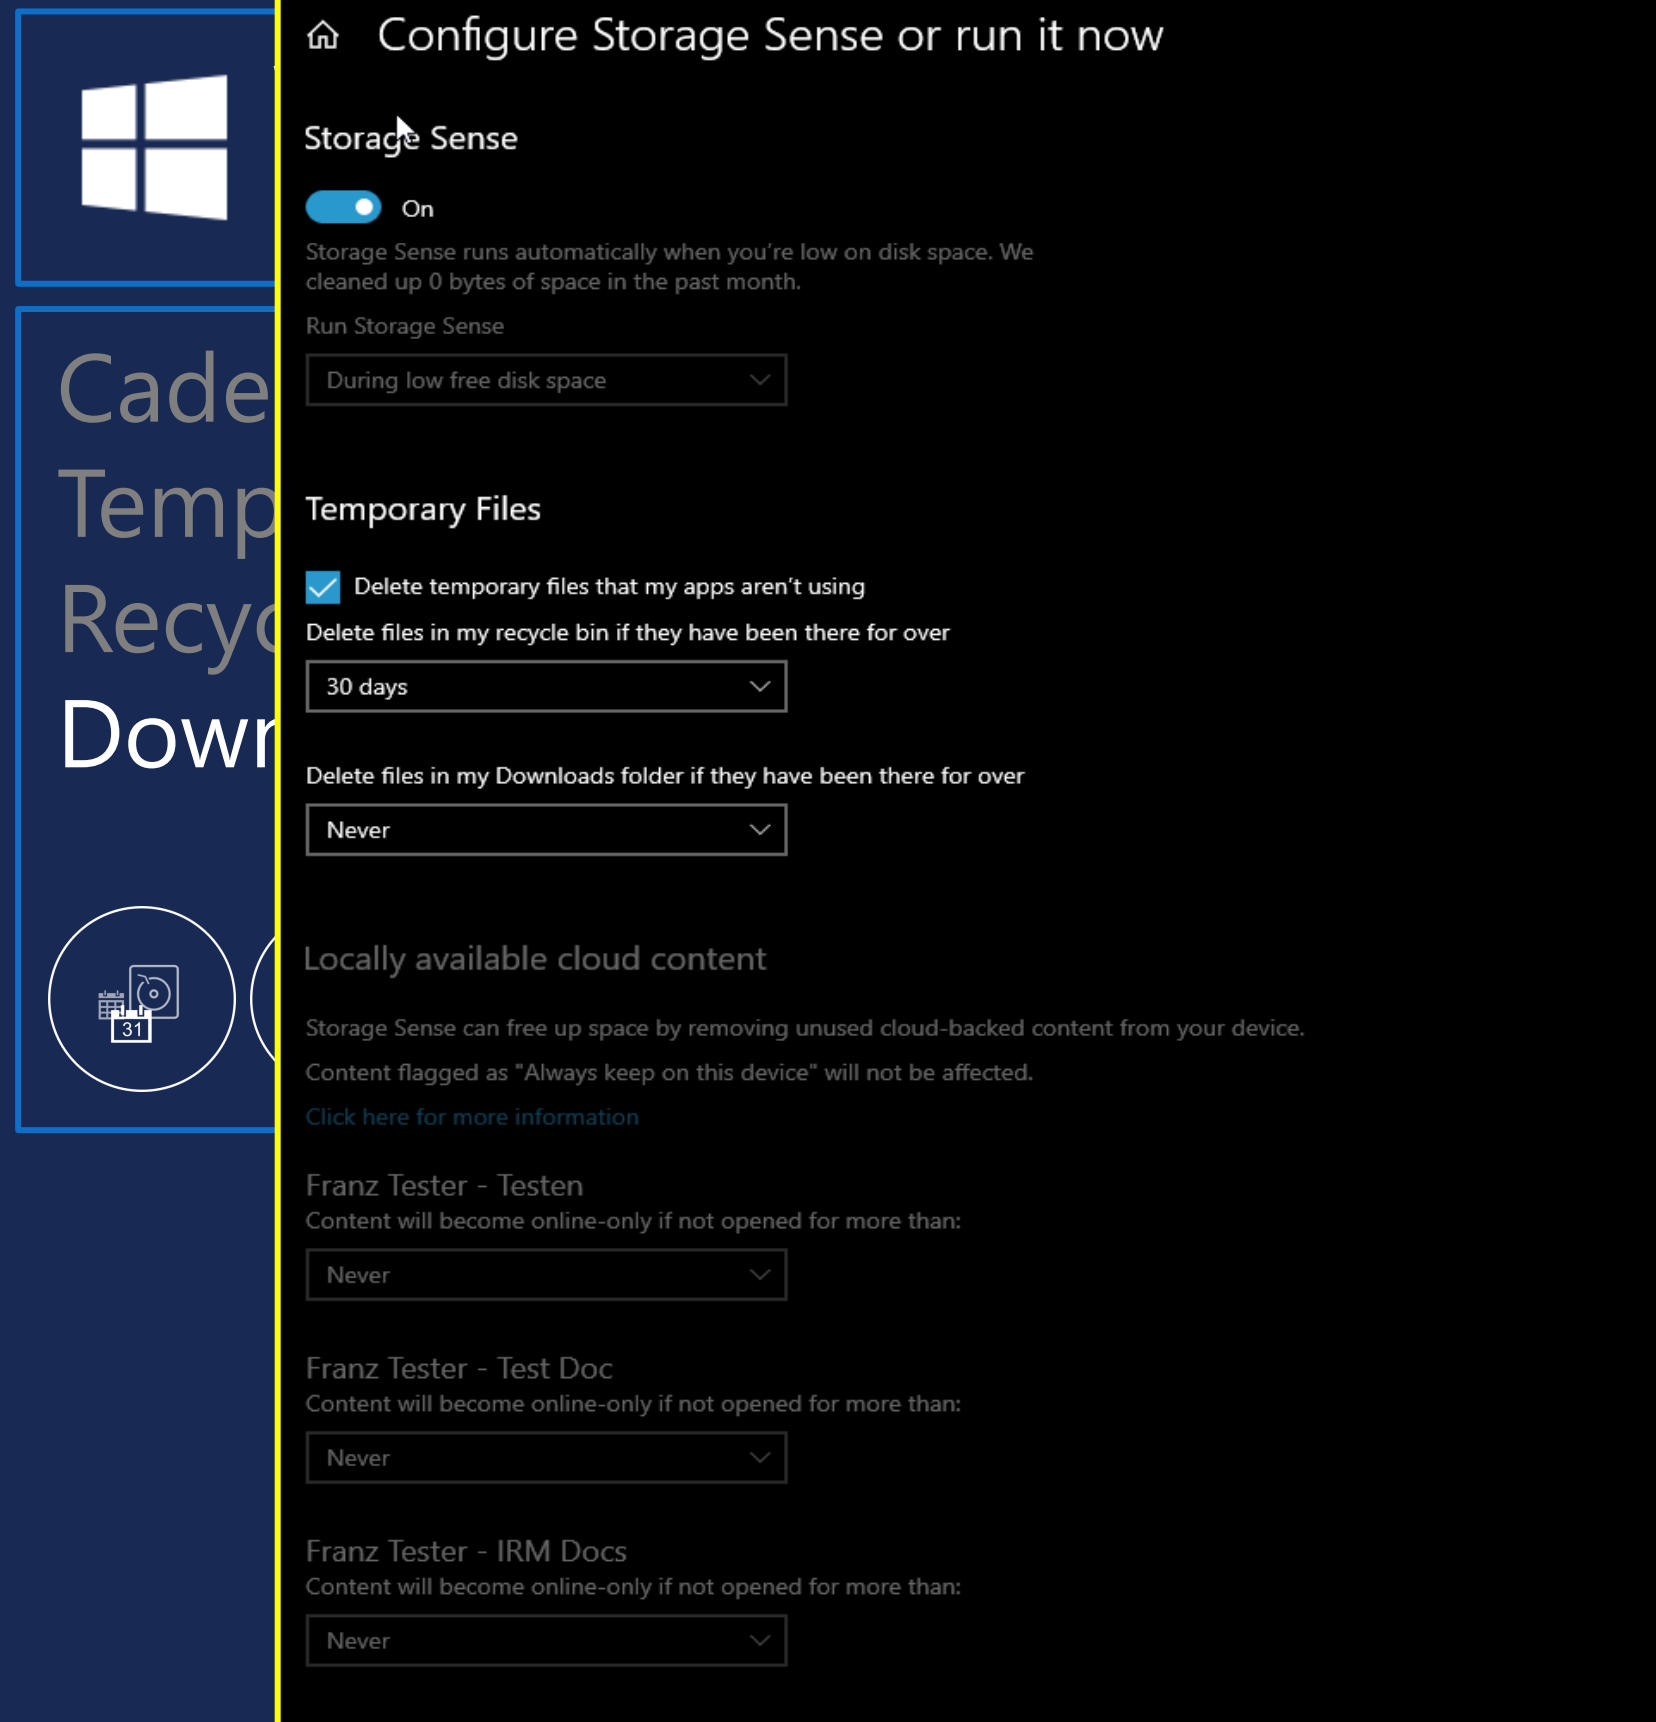

When Storage Sense runs, it can delete files in the user's Recycle Bin that have been there for over a certain amount of days.

Configure the minimum age threshold (in days) of a file in the Recycle Bin before Storage Sense will delete it.

Range: **0 - 365**.

Due to zero, Storage Sense will not delete files in the Recycle Bin. The default is 30 days.

10 Group Policies to control Windows 10 devices and OneDrive

Storage Sense Downloads cleanup threshold

When Storage Sense runs, it can delete files in the user's Downloads folder if they have been there for over a certain

minimum age threshold (in days) of a file in the Downloads folder before Storage Sense will delete it. Support values from 1 to 365.

Setting the value to zero, Storage Sense will not delete files in the Downloads folder. The default is 0, or never deleting files in the Downloads folder.

5:27 PM
Hello

Mr. OneDrive's Bot 5:27 PM
Hello and cordial **Welcome**.
The first articles were printed by me in trade journals, but that was in the last millennium. Then there were rigid websites, which were already outdated after the publication of an article. And then the **Blogs** were created. There are a lot of things to be found in dealing with collaboration scenarios." And because a lot of things can be delivered in person, I'm doing a lot of things at a variety of events where I'm talking about OneDrive.

Because writing (often in German and English) involves a lot of effort. **That's why I also offer workshops. For companies. Last a whole day.**
But now comes the next step. And with **Mr.OneDrive's Bot** I clone myself. I have to sleep from time to time, the bot does not, I can not speak another foreign language other than German and English. The bot already. He also responds in this language. AI and the Microsoft Cloud make it possible." I've been working with Microsoft technology for many years. My favorite programs are **Next Generation Sync Client, OneDrive for Business, OneDrive**, SkyDrive Pro, SkyDrive, SharePoint Workspace 2010 (formerly Groove) SharePoint and Work Folders.

5:29 PM
Hallo und willkommen

Mr. OneDrive's Bot 5:29 PM
Hallo und herzlich **Willkommen**.
Die ersten Artikel wurden von mir in Fachzeitschriften abgedruckt, aber das war im letzten Jahrtausend. Dann gab es starre Webseiten, die eigentlich schon nach der Veröffentlichung eines Artikels schon wieder veraltet waren. Und dann entstanden die **Blogs**. Einiges im Umgang mit Zusammenarbeits-Szenarien findet man dort.

Und weil vieles doch besser persönlich überbracht werden kann, tummle ich mich auf den verschiedensten Veranstaltungen, wo ich zum Thema OneDrive spreche.

Denn das Schreiben (in schreibe oft in deutscher und englischer Sprache) ist mit viel Aufwand verbunden. **Deshalb biete ich auch Workshops an. Für Firmen. Dauern einen ganzen Tag.**

Aber jetzt kommt der nächste Schritt. Und mit **Mr.OneDrive's Bot** klonen ich mich selbst. Ich muss ab und an schlafen, der Bot nicht, Ich kann ausser deutsch und Englisch keine weitere Fremdsprache. Der Bot schon. Er antwortet auch in dieser Sprache. AI und die Microsoft Cloud machen es möglich.

Ich beschäftige mich seit langen Jahren mit Microsoft Technologie. Meine Lieblingsprogramme sind **Next Generation Sync Client, OneDrive for Business, OneDrive**, SkyDrive Pro, SkyDrive, SharePoint Workspace 2010 (ehemals Groove) SharePoint und Work Folders.

Microsoft hat mich seit 2013 bis heute in ununterbrochener Reihenfolge mit dem MVP Award **ausgezeichnet**.

Entwickler dieses Bots Kommunikation mit Hans

Recommendations

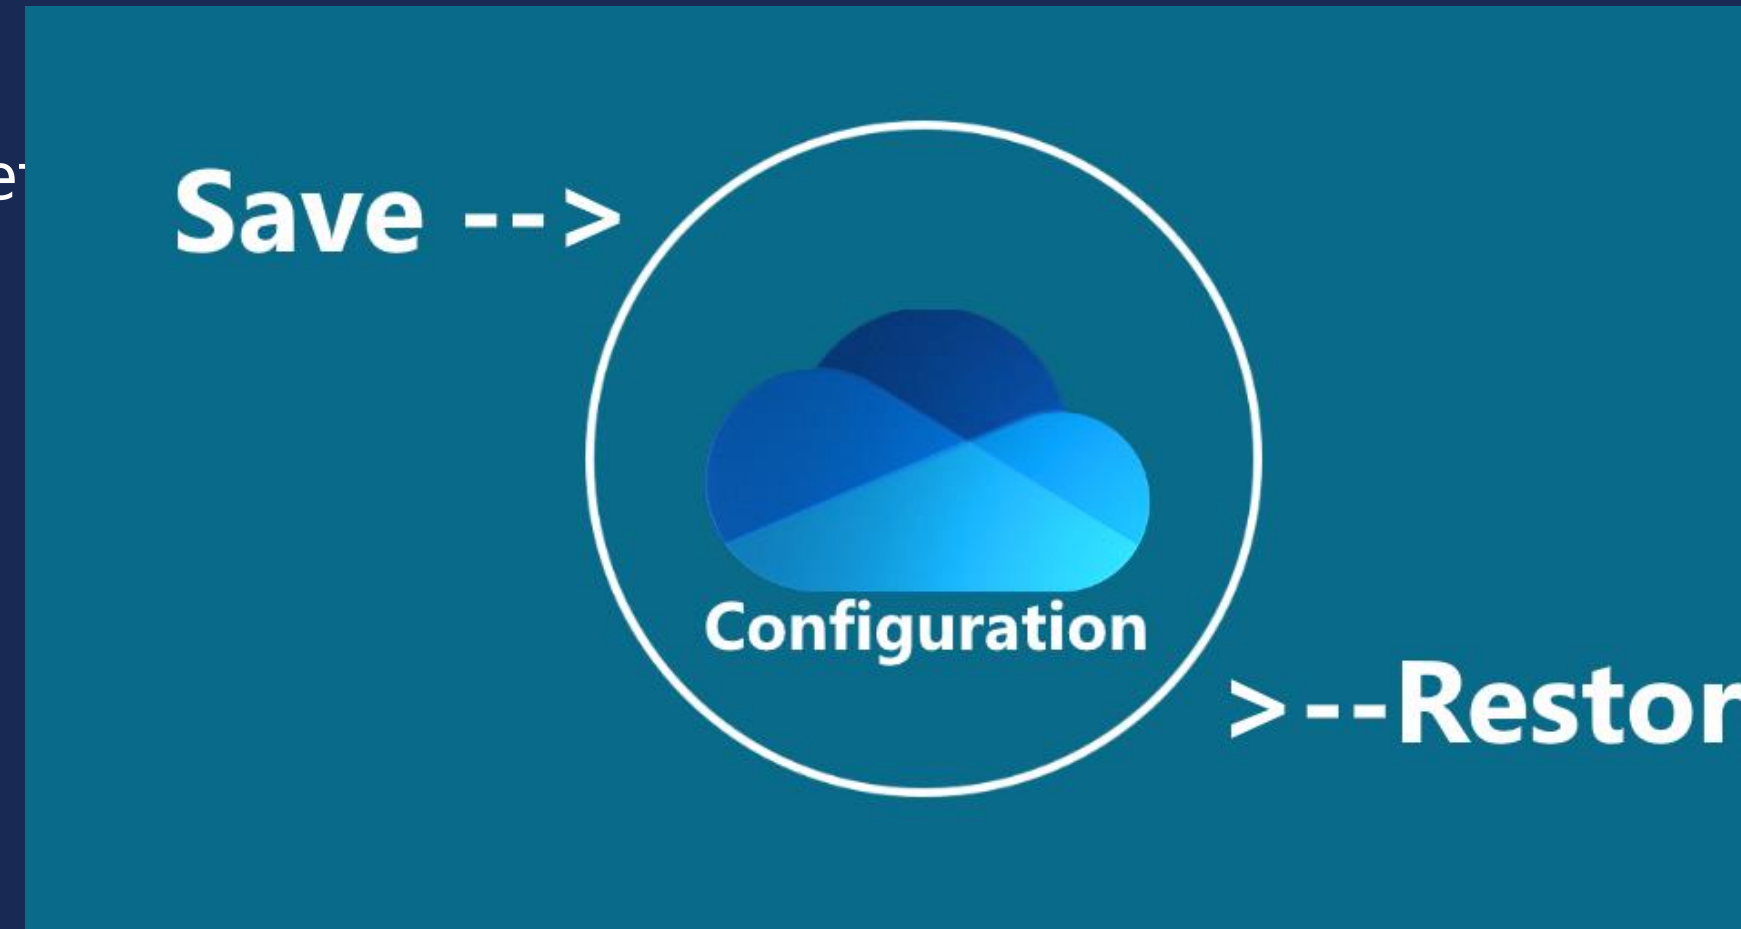

UserVoice: **Save and Restore current OneDrive configuration**

- Start OneDrive automatically when I sign in to windows
- Automatically pause sync when this device is on a metered network
- Display notifications when people share with me
- Warn me before removing files from the cloud
- Notify me when sync is auto-paused
- Save space and download files as you use them

for **each** account/location: **Choose folders settings**

- Manage Backup
- Upload rate
- Download rate
- Use Office applications to sync Office files that I open
- Sync conflicts
- Insider version
